President's Report

Hello Bromeliad Lovers,

The heat, humidity and almost regular rain are certainly doing wonders for your bromeliads. Your bromeliads should be as happy as they can be especially if you've given them a shot of fertilizer and started to take off the pups that will be next year's beauties.

Naturally, I suspect that half the club members have headed North for the summer. I wish I could go too.

Tom and I didn't make the FBCS board meeting since was too sick to go. The good news is that they took our money and let us join. Yeah!

Don't forget to bring a few good plants for the raffle table. You know you have too many!
