## President's Report

Hello Bromeliad Lovers,

The heat, humidity and somewhat regular rain are certainly doing wonders for your bromeliads. Your bromeliads should be as happy as they can be especially if you've given them a shot of fertilizer and started to take off the pups that will be next year's beauties.

This month we are going to have Nick talk about and show a bunch of bromeliad pictures he has taken over the years. Mostly plants from his collection.

Don't forget to bring a few good plants for the raffle table. You know you have too many!
